Tips & how to avoid plagiarism.

EVALUATING WEB RESOURCES
♦ Currency – check the date of the page. When was it last updated?
♦ Reliability – verify facts. Is the page accurate?
♦ Authority – who created the page? Is the author an expert in the subject of the page? Is there independent evidence of that – news interviews (think a Lexis/Nexis search), congressional testimony?
♦ Purpose – why was the page created? Is it a mask for advertising? An “unbiased” non-profit might not be so “unbiased.” Even .mil and .gov pages may have a point of view.
